

## Assignment No. 8

Create a database named **college**

Create a table name **student** in **college** database with following structure  
*roll,name,class,marks,age with respective datatypes.*

*Insert at least 7 entries in it.*

- 1) Create a procedure to pass the range of marks as input and print names of the students who lies in the range.
- 2) Create a procedure to display the summary table of the student record including sum, average, minimum and maximum of marks.
- 3) Create a procedure to input the roll number of student and output the marks of the same.
- 4) Create a procedure to input the minimum and maximum roll number and output the average of the marks in the given range of roll numbers.
- 5) Write a procedure to find the count of students whose marks are below 70%
